

## **Discussion Paper Protocol**

Discussion Papers deal mainly with issues that are the subject of ongoing discussions between Pimicikamak Okimawin and other governmental entities. The format was first developed by the Government of Manitoba and Manitoba Hydro. Discussion Papers may be formally adopted or remain in draft form.

Pimicikamak's Discussion Papers are developed with input from its representatives in intergovernmental discussions. They accord with Pimicikamak law and national policy.

### **Protocol**

Pimicikamak shares draft Discussion Papers with the relevant governmental entities (on dates as noted) with a request for comments. They may be amended based on comments received. Otherwise they are posted online after a waiting period of at least a week. All replies or other governmental discussion papers are posted online upon receipt.
